NON INVASIVE & INSTANT SKIN TREATMENTS ARE THE WAY TO GO

Do you have dark circles with tired looking eyes?

Do you have a horrid feeling that your face is travelling south?

Do you have Acne / Blemish / Scars / Pigmentation?

Are the fine lines/ wrinkles / aged hands worrying you?

Are you concerned about your stretch marks?

Would you prefer just skin maintenance because you are always short of time?

Dr. Geeta Oberoi

MICROPULSE treats just about every skin problem you can think of and is a brilliant Antidote to late nights.

A non-invasive procedure that combines laser light, micropulse, ultrasound & vacuum effectively, painlessly tackling face and body imperfections. All you will feel is a mild tingling sensation.

The treatment delivers tiny electrical impulse that mirror the body's own natural bioelectrical field. The impulses are delivered through slender probes for muscle re-education thereby increasing circulation, production of collagen and elastin and enhance the penetration of the active ingredients of skin care formulations. Based on Doctor's Consult, a course of treatments will be recommended to suit your needs.

ACNE / BLEMISH / PIGMENTATION / SCARS / SPOTTY BACK

Specially designed to encourage rapid healing and skin regeneration it acts as a decongestant to problem skin. The ultrasound treatment deep cleanses, exfoliates problem areas. The laser stimulates tissue repair, spots and blemishes are zapped within a few session

DARK CIRCLES AND TIRED LOOKING EYES

We use ultrasound and blue light therapy to remove the dead skin cells. The circulation procedure improves congestions and rehydrates which in combination works as a definitive healing treatment. A course of treatment dramatically reduces wrinkles; fine lines are smoothed and softened, puffy eye bags and dark circles are visibly diminished.

STRETCH MARKS AND CELLULITE

Wave good bye to the orange peel thighs with the electro cellulite treatment. The electrical stimulation breaks down fatty deposits, lifts sagging body muscles and reduces inches. This combined with the ILIPO assisted non invasive laser lipolysis gives the desired inch loss.

ANTIAGEING, FINE LINES, WRINKLES, AGED HANDS

For an extra boost the specialised treatment combines 7 phases. This remarkable treatment stimulates facial muscles to enhance the production of collagen and elastin, softening deep lines and wrinkles for the ultimate anti ageing experience.
