

LOOK GOOD feel good

At a time when cosmetic surgery has been embraced as a necessary evil, Dr. Geeta Oberoi of the Skin and You clinic offers simple non-surgical solutions. She has been a pioneer in introducing the latest superior technology in skin care and under her direction, the clinic boasts of the latest advanced skin care techniques in facial and body contouring solutions.

“There are countless reasons to avoid cosmetic surgery,” says Dr. Oberoi. “For the most part, there’s the risk of general anesthesia, scarring, painful injections, the overall risk of any surgical procedure, pre-op and post-op concerns, and of course, the risk of having foreign materials in the body” she adds.

As one of Mumbai’s leading aesthetic clinics, Skin and You offers pioneering technology that yields unprecedented results—visibly dramatic improvements and minimal discomfort. That smooth, effortless radiance is not a farfetched idea anymore. Providing medical solutions for all kinds of skin ailments, the clinic is a one-stop-shop for complete skin rejuvenation. Pigmentation, stretch marks, unwanted

growths; these are natural and common skin aberrations that you need not learn to live with. From laser hair removal procedures to simple solutions for different kinds of acne; from non-surgical cosmetic face corrections to exclusive bridal packages, Skin and You caters to all your skin related needs to give you flawless beauty. Their new Accent Ultra device combines radio frequency and ultrasound to bring about easy and painless body contouring. This treatment safely and effectively targets localised fat deposits with non invasive ultrasound and reduces body circumference without damaging the skin.

“With Accent Ultra, we know we’re giving our clients safe and effective remodelling—and clearly, the results speak” says Dr. Oberoi. An Accent Ultra session is performed in four to six sessions. An optimal body contouring plan would include a combination of Ultra and UniForm RF treatments to address fat reduction, followed by improvement in skin laxity and reduction of cellulite. Accent Ultra is ideal for sculpting thighs, stomach,

buttocks, and upper arms. The treatment yields results in just a few sessions, with noticeable circumference reduction.

Armed with state-of-the-art technology, Dr. Oberoi and her team of doctors provide the best pre and post-treatment support along with highest standards of hygiene and minimum downtime after treatments.

Healthy, glowing and flawless beauty has never been easier to attain and this trend setting clinic has set the bar high!
